Real Impact on Enviroment

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

Our Goals for 2030

We're racing to hit these targets to help the world reverse climate change and biodiversity loss. Together, we find the paths to make change possible.

[VIEW OUR PRIORITIES](#)**3B**

Avoid or sequester 3 billion metric tons of carbon dioxide emissions annually—the same as taking 650 million cars off the road every year.

**4B**

Conserve 4 billion hectares of marine habitat—more than 10% of the world's oceans—through protected areas, sustainable fishing and more.

**100M**

Help 100 million people at severe risk of climate-related emergencies by safeguarding habitats that protect communities.

**1M+30M**

Conserve 1 million kilometers of rivers—enough to stretch 25 times around the globe—plus 30 million hectares of lakes and wetlands.

**650M**

Conserve 650 million hectares—a land area twice the size of India—of biodiverse habitats such as forests, grasslands and desert.

**45M**

Support the leadership of 45 million people from Indigenous and local communities in stewarding their environment and securing rights.

Conserving the lands and waters on which all life depends

An illustration of four people cleaning a park. A woman in a purple shirt and blue pants is sweeping with a long-handled brush. A man in a yellow shirt and blue pants is also sweeping. A woman in an orange jacket is bending over, possibly picking up trash. A man in a blue shirt and yellow pants is sweeping. In the background, there are trees and a city skyline. The ground is covered with various pieces of trash like plastic bottles and a bag.
